

# CALF DEHORNING CRATE

## DEVICE DESCRIPTION

Our calf dehorning crate has a unique self-locking front gate with a simple locking bar neck yoke, which is additionally coated with soft material and allows for infinite neck positions to cope with all sizes of calves. The front gate is equipped with a soft head rest together with a restraint rope for better dehorning and castrating process. The front gate also possesses a spring loaded release handle which allows for easy gate opening and quick animal exit. The crate is also supplied with two belly straps and a backing up bar which can be set in three positions allowing for work with different sizes of calves. Our calf dehorning crate is mobile as it is supplied with wheels and handles for easy transport around the farm area. The frame of the crate has a hot-dipped galvanised finish and is filled with waterproof film-coated plywood.
